How does the VAT payer file a simplified VAT return?

The overall process to file your VAT obligations using the simplified VAT return is similar to the process of filing the full VAT return. Please refer to section 3 of this guide for further details and guidance.

How does the VAT payer report adjustments on the simplified VAT return?

There is no specific column for reporting adjustments on the simplified VAT return. Instead, all fields on the simplified VAT return should be reported net of adjustment. For example, if a VAT payer has 10,000 BHD of standard-rated sales in 2020 Q1 and needs to make an adjustment of 2,000 BHD to their 2019 Q4 VAT return, then the VAT payer should report 8,000 BHD of standard-rated sales in 2020 Q1 when using the simplified VAT return. This differs from the full VAT return, where the VAT payer would need to report 10,000 BHD of standard-rated sales and 2,000 BHD of adjustments to standard-rated sales in separate fields. Kindly note that NBR reserves the right to validate VAT filings and could ask VAT payers for a detailed record demonstrating both the gross amounts and the adjustments made.

How does the VAT payer report zero-rated and / or exempt purchases on the simplified VAT return?

Zero-rated and exempt purchases should be included within the field 'Total purchases'. Note that only deductible VAT related to your standard rated purchases and imports will be reported in the VAT field.

How does the VAT payer account for apportionment on the simplified VAT return?

There is no specific column for apportionment on the simplified VAT return. Instead, the VAT payer should only report deductible VAT paid on the field for 'VAT amount' on purchases.

For example, a VAT payer made 10,000 BHD of purchases in 2020 Q1, on which the VAT payer paid 500 BHD of VAT. Of this VAT 300 BHD was deductible. The VAT payer would report 10,000 BHD in the field for 'Total purchases' and 300 BHD in the field 'VAT amount' on purchases if using the simplified VAT return. Kindly note that NBR reserves the right to validate VAT filings and could ask VAT payers for a detailed record demonstrating the apportionment calculation made.

How does the VAT payer report standard-rated sales to a domestic purchaser who applies the domestic reverse charge mechanism?

Standard-rated sales made to a domestic purchaser who has the right granted by NBR (supported by a valid certificate) to apply the Domestic Reverse Charge Mechanism should be reported in the field 'Other & exempt sales'. Kindly note that NBR reserves the right to validate VAT filings and could ask VAT payers for a detailed record demonstrating these sales.

How does the VAT payer report exports on the simplified VAT return?

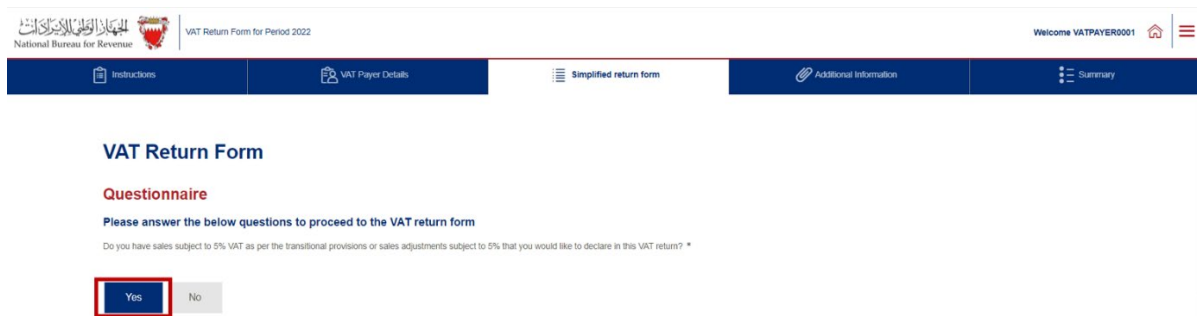

Exports should be reported in the field 'Zero-rated (including exports)'.

Kindly note that NBR reserves the right to validate VAT filings and could ask VAT payers for a detailed record demonstrating the value of their exports.

In accordance with the transitional provisions, what are the procedures for submitting VAT return form if the VAT payer made sales, purchases, and imports subject to 5%?

With regards to the change in VAT standard rate, an additional step has been added to the VAT return form. You will need to answer the questionnaire before proceeding to the VAT return form and based on your answers, certain fields to report the transaction made at 5% will be displayed in the VAT Return form.

For more details and information please refer to VAT Rate Change Transitional Provisions Guide.
